| <b>Date</b>          | 13 July 2026                                                   |
| <b>Team ID</b>       |                                                                |
| <b>Project Name</b>  | SkillEcho — Voice-Based Concept Understanding Analyser (VBCUA) |
| <b>Maximum Marks</b> | 3 Marks                                                        |

### Step 1: Brainstorm and Idea Listing

Each team member listed out ideas without judging them at this stage, across two structured “How Might We” brainstorming sessions that produced fifteen initial ideas. The table below shows a representative entry per member for each of the three ideas that advanced to grouping.

| S.No | Team Member                    | Idea / Suggestion                                                                                                                          | Category              | Group No. |
|------|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------|
| 1    | Gummala Sagar Sandeep Kumar    | Voice-Based Concept Understanding Analyser (SkillEcho) — evaluate spoken explanations using ASR + semantic similarity + acoustic features. | AI/ML EdTech          | 3         |
| 2    | Rajulapudi Sandhya             | Interactive Quiz Application with auto-graded MCQ / True-False / short-answer formats.                                                     | EdTech Tool           | 1         |
| 3    | Archana Kasi                   | AI Proctoring Tool using webcam feeds to detect suspicious activity during online exams.                                                   | EdTech / Security     | 2         |
| 4    | Guddati Bhanu Durga Ram Prasad | Gamified leaderboard extension for the quiz application to boost engagement.                                                               | EdTech Tool           | 1         |
| 5    | Movva Tanuj                    | Browser lockdown / WebRTC monitoring extension for the proctoring concept.                                                                 | Security / Compliance | 2         |
| 6    | Rajulapudi Sandhya             | Extend SkillEcho's evaluation engine to score technical-interview responses for HR use cases.                                              | AI/ML HR-Tech         | 3         |

### Step 2: Idea Prioritization

Each grouped idea was rated on feasibility and importance against a five-criterion weighted evaluation matrix (AI/ML Innovation 30%, Real-World Problem Fit 25%, Technical Complexity 20%, Scalability Potential 15%, Feasibility 10%), and the final idea was selected to move forward with.

| Group No. | Final Idea                                                     | Feasibility | Importance | Priority | Selected |
|-----------|----------------------------------------------------------------|-------------|------------|----------|----------|
| 1         | Interactive Quiz Application                                   | High        | Low        | Low      | No       |
| 2         | AI Proctoring Tool                                             | Low         | Medium     | Medium   | No       |
| 3         | SkillEcho — Voice-Based Concept Understanding Analyser (VBCUA) | High        | High       | High     | Yes      |

### Final Decision

SkillEcho (VBCUA) was unanimously selected as the capstone project (weighted score 4.75 / 5, versus 2.90 for the AI Proctoring Tool and 2.30 for the Interactive Quiz Application) due to its superior AI/ML depth — combining Automatic Speech Recognition, NLP-based semantic evaluation, and DSP-based acoustic analysis — its validated real-world problem fit, and feasible deployment under the team's cloud resource constraints.

### Decision Stakeholders

| Team Member                    | Role                | Vote      |
|--------------------------------|---------------------|-----------|
| Gummala Sagar Sandeep Kumar    | Lead — ML / Backend | SkillEcho |
| Guddati Bhanu Durga Ram Prasad | Planning            | SkillEcho |
| Rajulapudi Sandhya             | UI / Setup          | SkillEcho |
| Archana Kasi                   | Functional Testing  | SkillEcho |
| Movva Tanuj                    | Performance Testing | SkillEcho |
